

Please reject NAB Petition 04-160. Allow Sat. radio to provide the kind of on-demand information that this day and age needs. I use XM traffic and weather everyday to help me safely commute to and from work, and do not have to wait every 15-20minutes for a local station on AM to do so. On top of that, traffic and weather only gets announced during the "Rush" hours. With Sat radio I get it on demand. This service also helped me to navigate my family thru the treacherous storms that hit the mid-west over the Memorial day weekend. The multiple city listings gave us the most up-to-date status of severe weather locations, as well as information on flooded roads and downed wires. Allow this service to stay, keep listeners informed and maybe SAVE LIVES!
